CO2 PACMAN | Interreg Euro-MED | Co-funded by the European Union

CO2 PACMAN

COoperation and CO-designing PArtnership for CliMAte Neutrality

OUR PROJECT

The CO2 PACMAN project is designed to provide essential knowledge and tools for implementing integrated strategies and policies to address climate change mitigation and adaptation challenges. By engaging public authorities, citizens, and stakeholders in co-creation processes, the project will develop scenarios for transitioning towards climate-neutral islands. Activities will be demonstrated in three target islands: Brac in Croatia, Crete in Greece, and Elba in Italy. The experience gained will then be transferred to Tuscany in Italy and Athens in Greece. The goal is clear: to foster cooperation, innovation, and capacity-building toward a carbon-neutral future.

Total budget
€ 3.573.230,00

Project duration
01/2024 - 03/2028

Interreg Funds
€ 2.858.584,00
